- Budgeting
- Scheduling

Project Highlights:

A new LEED Gold science/upper school classroom building with a green roof. Planning for the construction and renovation of the existing academic school, including ADA upgrades and converting existing lab space into classroom space. Lower school renovation included converting the existing cafeteria and shop area into new lower school classrooms. Master planning for the entire campus including new science building, new athletic facilities and the renovation of the existing academic building. Campus was occupied the duration of the project.
